About the Filmmakers

6minor Films is based in Nashville and is comprised of Mike Purcell and Eric Fazzini. Mike is a life-long Nashville native who entered the music business as an audio engineer in 1995 after attending Belmont University. He has worked with numerous songwriters and mixed thousands of songs over the course of his career. Mike always had an interest in video and that's where Eric Fazzini came in. Eric moved from Colorado in early 2013 to help with sound design for feature films that Mike was mixing. The two hit it off instantly, and through their mutual interest in video, they developed a series about a subject matter in which they shared a passion. Eric spent the years prior to moving to Nashville as the sax player for the ska band *Voodoo Glow Skulls* and has toured the world on multiple occasions.
